Instructions

The CDSN has developed a Conservation Partnership Program with membership levels to fit the needs of our customers. The Partner Program is our entry-level program for new members that have the desire and commitment to work on conservation within their organization. The Associate Program is designed for organizations that have taken their efforts to the next level—they have performance targets and goals and have begun their implementation efforts. The Certification Program is our top-end program for organizations that have achieved or exceeded their conservation goals.

The CDSN will use this application as the basis for determining an applicant's suitability for membership in the **Partner Program**. All applicants must have a desire and commitment to conservation and have taken some steps to implement conservation practices. In applying for this program you are indicating your willingness to document at least some of the steps you have taken. The CDSN's Conservation Partnership Program uses the following topic areas to describe "conservation":

- Administration & Finance
- Energy Conservation
- Pollution Prevention
- Community Participation
- Air Quality
- Water Conservation
- Waste Management

The remainder of this application will collect the basic information from the applicant about your conservation efforts. Applicant's conservation commitment will be evaluated based on the information provided. Recognition is given on the CDSN website, www.cdsn.org to those who are accepted into the Conservation Partnership Program at the Partner Level.

Applicants wishing to be recognized for a more complete effort based on written goals, baselines, and plans are encouraged to participate in the **Associate Program**. Applicants interested in recognition for the effectiveness and impacts of their efforts are encouraged to participate in the Conservation District's **Certification Program**.

Conservation Subject areas

Administration & Finance (leadership, administration, purchasing, PR, HR, etc.)

Action areas: Leadership, Staffing, Planning, Communication, Purchasing, Reporting
