North Las Vegas Civic Center Gardens

The CDSN and the City of North Las Vegas teamed up with community partners to create the Civic Center Conservation Gardens at the CNLV City Hall Complex. The project entailed converting a turf intensive landscape to a conservation demonstration garden. It encourages the City of North Las Vegas' residents and visitors to use effective landscape techniques for the desert southwest using best management practices relating to soil, air, wildlife, plants, trees, water and energy.

A main trail and secondary pathways lead visitors through creative residential landscape designs showcasing specialty themes and gardens.
